

Learn Essential Tools for Designing & Implementing Changes That Stick

Project disruptions, client resistance and evolving industry standards mean that change is a constant in contracting, but the 'tried and true' methods die hard. This seminar will provide you with practical strategies and tools to effectively manage change both within your teams and on-site. Join us for "Managing Change @ Work" to keep your projects on track and your business thriving in today's dynamic environment.

Instill a Change Mindset

Leverage Incremental Change

Develop Successful Change Plans

Ensure Successful Change Adoption

"Resolve to be a master of change rather than a victim of change."
